Our Palomar StarLux® IPL (Intense Pulsed Light) treatments are the most effective way that you can reduce unwanted brown and red discoloration of the skin, or permanently eliminate unwanted hair from just about anywhere on your body. These painless procedures have no downtime, and you'll see visible reduction of brown spots and red discoloration gradually, over the next few weeks following treatments. You will also benefit from permanent hair reduction and eliminate the expense and inconvenience waxing, shaving, or depilatory creams.

**Before**

**After**

This is one of my gracious patients 7 months following **Rhinoplasty Surgery**. On the front view, you can see that the tip and bridge are narrowed. She also had a painless, in-office **Silikon®-1000** treatment for **Lip Augmentation**. These natural, gorgeous results are permanent.

### **One of Our Patient's Experience**

*“Dr. Joseph sets the standard for all physicians. He devotes a great deal of time in order to explain and educate you about the procedures he will be performing. He is extremely approachable. You will feel comfortable asking him any questions you may have. I was confident in his ability within moments of meeting him. Never once did I feel pressured to do anything I was not entirely comfortable with. Dr. Joseph's staff is wonderful and they are always there to help you. AND BOY, DO I LOOK GREAT! It is amazing what results can be achieved with the silicone injections. It works beautifully. There is no pain; it is permanent and more affordable than the other fillers. I am thrilled with my results! I would encourage anyone to try this procedure and come out feeling and looking so much better. Thank you so much Dr. Joseph”.*
